Summary

Analytical thinker who blends engineering knowledge, problem-solving skills, and creativity in my work. Committed to continuous learning and upskilling.

Education

Universiti Teknologi Mara (UiTM) Bachelor in Mechanical Engineering (Hons) • 3.55 CGPA
02/2016 - 02/2019

Experience

Keppel Technology Solutions Pte. Ltd. Bandar Utama, Selangor
Network Operation Center Engineer 12/2022 - Present

- **Infrastructure Surveillance:** Provide 24/7 proactive monitoring of hybrid infrastructure, including on-premises network devices and Windows/Linux server environments to ensure 99.9% uptime.
- **Cloud Health Management:** Oversee Azure and AWS cloud health utilizing Azure Monitor and AWS Health Dashboard; triaging alerts and executing incident response.
- **Data Resiliency:** Manage and audit daily backup operations for critical business data, ensuring successful recovery points and compliance with RPO/RTO targets.
- **Endpoint & Security Ops:** Orchestrate monthly Windows Patch Management and coordinate threat response for malware/suspicious activity, maintaining environment hardening.

NTT Cloud Communications (Malaysia) Bandar Utama, Selangor
Global Support Engineer 05/2021 - 11/2022

- **Global Technical Support:** Acted as a Tier 1 escalation point for global enterprise clients, managing complex Service Desk requests for UCaaS solutions.
- **VoIP Protocol Analysis:** Diagnosed voice quality issues by analyzing SIP call flows to isolate faults between carrier, SBC, and internal networks.
- **Microsoft Teams Engineering:** Provided specialized support for Teams Phone System, troubleshooting call routing, Direct Routing, and media quality issues.
- **Identity & Access Management:** Managed full lifecycle of Teams Voice users, including provisioning and configuration via Teams Admin Center.

Celcom Networks Sdn. Bhd. Petaling Jaya, Selangor
Network Operation Center Engineer 06/2019 - 05/2021

- **Layer 1 & 2 Network Remediation:** Diagnosed and resolved physical and data-link layer faults on **Cisco transport infrastructure**; identified and cleared **Cyclic Redundancy Check (CRC)** errors and input errors to mitigate packet loss and ensure stable backhaul synchronization.
- **Infrastructure Health & Resource Auditing:** Conducted real-time device health assessments via CLI, monitoring **CPU/memory utilization thresholds** and interface throughput statistics to maintain 99.9% uptime for high-capacity **Radio Access Network (RAN)** services.
- **Connectivity & Path Validation:** Executed end-to-end reachability testing and path-trace diagnostics to isolate routing loops and measure latency; utilized **ARP table analysis** to verify Layer 2-to-Layer 3 mapping and resolve device adjacency issues across the **Packet Transport Network (PTN)**.
- **Fiber Infrastructure & Circuit Assurance:** Directed surveillance of the core optical fiber backbone; utilized Network Management Systems (NMS) and **Digital Optical Monitoring (DOM)** to pinpoint fiber degradations and cuts, significantly reducing **Mean Time to Repair (MTTR)**.

Certifications

AZ900 – Microsoft Certified : Azure Fundamentals
05/2021 - Present

MS700 – Microsoft 365 Certified : Teams Administrator Associate
10/2022 - Present

Cisco 200-301 – Cisco Certified Network Associate (CCNA)
12/2023 - 12/2026

AZ104 – Microsoft Certified : Azure Administrator
12/2024 - Present

AZ700 – Microsoft Certified : Azure Network Engineer Associate
12/2025 - Present

Projects

Personal Portfolio | Azure Static Web Apps & GitHub Actions
01/2026

- Deployment: Hosted a modern web application on Azure Static Web Apps with automated deployments via GitHub Actions.

- Tooling: Leveraged Tailwind CSS and Gemini AI for rapid UI development and logic refactoring.

- Infrastructure: Established a full CI/CD workflow where every repository push triggers an automated build and deployment cycle.
<https://muazamirruddin.com>

Enterprise-Grade Static Hosting | AWS (S3, CloudFront, IAM, ACM)
02/2026

- Architected a globally distributed delivery pipeline using Amazon S3 for origin storage and CloudFront (CDN) for low-latency edge caching.

- Orchestrated automated deployments using CI/CD pipelines to synchronize local builds with the AWS ecosystem.

- Managed DNS and Security : Configured SSL/TLS certificates and custom domain mapping via Cloudflare and AWS Certificate Manager to ensure end-to-end encryption.

Skills

- 🔌 **Microsoft Azure**
- 🔌 **Amazon Web Services**
- 🔌 **Microsoft Teams Admin Center**
- 🔌 **Cisco Evolved Programmable Network Manager**
- 🔌 **Cisco Webex Control Hub**
- 🔌 **Solarwind Orion**
- 🔌 **Wireshark**
- 🔌 **N-able : N-Central, Cove Data Protection**
- 🔌 **SentinelOne**
- 🔌 **Huawei's iMaster NCE (Network Cloud Engine) and Automatically Switched Optical Network (ASON)**
